BS in Packaging Science

Rochester Institute of Technology, Rochester NY

In Major GPA: 3.5 Deans List: Spring 2018

-December 2019 Graduation with English Immersion-

EXPERIENCE

Bakerly, Easton, PA — R&D Packaging Engineer

December 2020 - July 2022

- Innovates new packaging and logistics solutions for high speed food production facilities.
- Coordinate art development for film and corrugated printing.
- Handles supplier relations and provides technical support to procurement and production teams.
- Executes trials to validate new packaging design and materials.
- Launches simultaneous cost savings initiatives.
- Establishes communication link between corporate marketing team and floor supervisors.

McCormick & Co, Hunt Valley, MD — Packaging Development Intern

June 2018 - January 2019

- Assisted “Design-To-Value” team in comparing our competitor’s products to our own, identifying our position, and understanding appropriate market opportunities.
- Established test protocols for verifying new products in incumbent packaging systems.
- Developed an evolving report on experimental shipping methods.
- Fabricated prototypes for urgent brand revitalizations.
- Loaded and created specifications within SAP.
- Performed analysis on global sensitive products.

American Packaging Co, Rochester, NY — Technical Intern

June 2016 - January 2017

- Performed physical and chemical testing of plastic, paper, and foil structures to report to customer companies.
- Aided in analyzing competitor products and replicating outstanding structures.
- Generated reports, utilizing data from years of company data.
- Assisted in customer audits and designed experiments with a third party company to discover sources of problems.
- Completed daily quality assurance of outgoing material.
